

**KTH EXECUTIVE
SCHOOL**

Executive Program in Industrial Management 2nd Round, 2021

The know-how, perspectives and inspiration to lead
industry transformation

Starts on Oct 19

Managing disruptive business landscapes

In focus The know-how, perspectives and inspiration to lead industry transformation

Why join now?

Digitalisation with technologies driving the Fourth Industrial Revolution are disrupting the business landscape, amplified by environmental challenges. Rising geopolitical tensions and the recent global pandemic adds to the complexity.

Major business opportunities arise for those who seize them and risks to those who do not.

Leaders need to grasp the new environment in which we operate and revisit the strategic analysis. Find a balance to exploit the known and explore the unknown to maximise results over time.

Companies need to build new capabilities and learn new ways to operate, where customer-centric innovation and a fast learning organisation is key to success.

This program builds the capabilities of leaders by providing the **perspectives, insights, tools and mindsets** necessary to drive transformation and gives access to an alumni network for continued development.

For what kind of companies?

This program is designed for international companies vital for the future industrial ecosystem where technology is core to the business. Previous participants represent companies like **ABB, Atlas Copco, BAE Systems, De Laval, ELEKTA, Epiroc, Ericsson, SAAB Group, Scania, Sandvik, Siemens Energy, Stora Enso, VBG Group and Volvo Cars.**

Who are the participants?

The program addresses managers that need to drive transformation from sourcing, supply chain, operations, R&D to sales and general management.

A qualification process secures relevant interaction among participants.

The faculty

The participants meet a selection of top business leaders and lecturers from academia from KTH and other top universities.

Themes in the program

Tech insight – Under the hood of tech

- **Visits to KTH labs** to gain insight to state-of-the-art tech underpinning the Fourth Industrial Revolution e.g. **visualization, AI, robotics, IoT, 5G, 3D printing and cybersecurity**
- Infused in every module

Module 1 – The business environment and technology shifts

- How technology shifts drive change
- The current shift driven by digitalisation, electrification and sustainability

Module 2 – Business strategy

- Tools and methods for strategy building
- Innovation and business modelling tools
- New business models – servitization, platforms and ecosystems

Module 3 – How to operate in new business environments

- Creating customer-centric innovation
- Data-driven decision making
- New governance systems

Module 4 – How to lead change

- Leading and communicating change
- Methods to identifying and clearing barriers to change
- Participants' business challenges

Format and practicalities

The learning format

The programs builds on active learning sessions in classroom mixed with visits to labs on KTH campus and online session.

Each participant brings a business challenge that will be addressed throughout the program in group, by lecturers and in 1:1 coaching sessions and concluded in an action plan at the end of the program.

The program length and location

The program is split over four three-day modules on campus and three half days online in between.

The location is at new facilities at KTH Royal Institute of Technology campus in Stockholm – with accommodations in the vicinity.

Calendar

Module 1	19-21 Oct 2021
Module 2	18-20 Jan 2022
Module 3	15-17 Mar 2022
Module 4	3-5 May 2022
Online	6 Dec 2021, 8 Feb and 5 Apr 2022

Application and admission

To apply, please register with this [link](#).
