

Why now?

We are facing a world of uncertainties driven by structural forces including disruptive new technologies, accelerated climate change. Emerging dynamics of a fragmented society within and between states increase tensions with risk of conflicts as we are witnessing in Europe. Such a volatile world demands an ability by organisations adapt and learn to survive and thrive.

Leaders need to grasp the new environment in which we operate, revisit the strategic analysis, find a balance to exploit the known and explore the unknown to create sustainable results.

Companies need to build new capabilities and learn new ways to operate, where customer driven innovation and a fast-learning organisation is key to success.

Why this program?

This program builds the capabilities of leaders by providing the perspectives, insights, tools and mindsets necessary to drive transformation and gives access to an alumni network for continued learning.

What will you learn?

How to get ahead by understanding new trends and technologies, helping your business stay competitive

How to spot and seize new business opportunities

How to build a team that's ready for change and can quickly adapt to new situations

How to talk and work with other participants to tackle real-world business challenges

How will you learn?

You will learn from a selection of top business leaders and lecturers from academia from KTH and other top international universities.

You will learn in active learning sessions in classroom mixed with visits to labs on KTH campus and online session.

Each participant is expected to share and discuss a transformational challenge to learn from one another and develop a strategy how to address it.

Benefits

To you

Improve your business acumen and leadership skills, making you better at guiding your organization through change

Get better at decision-making and problem-solving, helping you drive change in your business

Meet and connect with other professionals, opening doors for future teamwork
